In the Supplement of the article “Solar and volcanic forcing of North Atlantic climate inferred from a process-based reconstruction” there is an error in Table S1, where only 8 volcanic eruptions are listed instead of 12. In the discussion paper the table is complete (Table S3, <https://www.clim-past-discuss.net/cp-2018-32/cp-2018-32-supplement.pdf>, last access: 11 October 2018). The error in the Supplement is solely typographical and does not influence the results of the study. The Supplement of the final publication has now been updated with a complete version of Table S1.
