Dear Dr Badejo We have now received two reviews of your manuscript you submitted to Climate of the Past. Although they are positive on the importance of your data set, they are both quite critical on the structure of the manuscript, and the interpretation of your data set. They also criticize the English. I share their criticisms. Because I also think your records are of great interest, I would suggest that you transform deeply your manuscript following the comments of the reviewers, and that you submit a new version to Climate of the Past with a rebuttal letter. This new version would be reviewed

C1058

again by the same or by alternate reviewers. I am sorry to not been able to be more positive at this stage. Hoping you will submit a revised version, I'll be happy to answer any question that could help to improve your manuscript. Yours sincerely. Luc Beaufort
