We appreciate that Dr. Yannick Garcin, as a colleague who is familiar with the peculiarities of the AHP due to having worked on the subject on Lake Turkana (which is just a few km southwards of Chew Bahir) for several years, has contributed to the public discussion and pointed out what needs to be further clarified. For our reply to his comment please refer to the pdf supplement (especially point 7) as his statement slightly overlaps with that of the two reviewers.
