

Interactive comment on “Links between CO₂, glaciation and water flow: reconciling the Cenozoic history of the Antarctic Circumpolar Current” by J.-B. Ladant et al.

J.-B. Ladant et al.

jean-baptiste.ladant@lsce.ipsl.fr

Received and published: 5 September 2014

Dear editor and referees,

I have uploaded the revised version of the manuscript as well as the response to referees. It should take a few days to go through validation by the editorial services. I am aware that the response to referees that I attached to my former comment refers constantly to the revised manuscript and therefore I apologize if you cannot see the latter while it undergoes file validation by the editorial staff.

Jean-Baptiste Ladant
