

Interactive comment on “Northern Hemisphere control of deglacial vegetation changes in the Rufiji uplands (Tanzania)” by I. Bouimetarhan et al.

M. Claussen (Editor)

martin.claussen@mpimet.mpg.de

Received and published: 7 January 2015

The reviewers consider the paper, specifically the view on vegetation changes, very useful. Both reviewers raise, however, some concerns regarding the palaeoclimatic interpretation. One reviewer suggests minor revisions, the other (referee 2) asks for major revisions. Hence I encourage the authors to submit a carefully revised manuscript along the suggestions by the reviewers including a point-by-point response to all comments of the reviewers.

Best regards

Martin Claussen
