Dear authors

The discussion time of your paper is now closed. Both reviews are positive and propose to accept the paper with minor or technical revision. You have now to reply to the comments of both reviewers and to propose a new version, which will be considered for publication in Climate of the Past. This new version will be supported by a cover letter explaining the changes that you have done or not. I should appreciate to receive as a supplement a track change file.

With my best regards

C2215

Joel Guiot
