

## ***Interactive comment on “Implication of methodological uncertainties for Mid-Holocene sea surface temperature reconstructions” by I. Hessler et al.***

**S. McIntyre**

stephen.mcintyre@utoronto.ca

Received and published: 22 April 2014

The authors state: "The complete data set is available on [www.pangaea.de](http://www.pangaea.de)". However, the data is password protected and not accessible for open review.

The authors state elsewhere "we strongly urge the community to ensure that marine data and reconstructions are promptly archived". I endorse this and urge the authors to remove password protection on their dataset.
