Received and published: 7 March 2014

You will see that we have received three reviews of your paper. They are all favourable and believe it should be published. They all have a number of specific comments that need to be addressed. Some of these are clarifications of what you did, and others request clarification of what others did so that this is accurately represented. I encourage you to prepare a new version for Climate of the Past, addressing all the issues raised. As you know you are also required to respond with an author comment to each review.

Interactive comment on Clim. Past Discuss., 10, 65, 2014.
