

Dear Mr. Fleitmann,

Herewith we resubmit the manuscript to the paper "Palaeo sea-level and ice-sheet databases: problems, strategies and perspectives". In this we have incorporated the recommendations by the two reviewers, as we already have announced in detail in our "Reply to the reviewers" in the discussions. Due to the vast amount of changes we had done in the past months, we would like to change the author's list, as we have it included in the new manuscript. We hope that this is still possible.

Kind regards,  
André Düsterhus
