Supplement of

Climate-driven expansion of blanket bogs in Britain during the Holocene

A. V. Gallego-Sala et al.

Correspondence to: A. V. Gallego-Sala (a.gallego-sala@exeter.ac.uk)

The copyright of individual parts of the supplement might differ from the CC-BY 3.0 licence.

This Supplementary file contains information on the individual sites used for the basal ages compilation, including latitude and longitude (decimal°), altitude (m), source reference, lowermost radiocarbon date (14C date) and its uncertainty (error) in years BP, the age of this date in calibrated years BP (and uncertainty), the depth of the peat at the site, the dating method used to establish the basal age of the peat (either a radiocarbon-based chronology, 14C, or a pollen-based chronology) and the region to which the site is assigned in our analyses.

SITE NAME	LONGITUDE	LATITUDE	REFERENCE	14C DATE (BP)	ERROR	CAL DATE (BP)	ERROR	ALTITUDE	Peat Depth	DATING METHOD	Age extra- polated	REGION
