Dear authors,

your paper has been seen by two reviewers. Both reports are quite detailed and they raised critical points, the most important being the absence of a clear description of the methodology used in your study. Given the numerous questions raised, I'm sorry to let you know that your contribution will not be further considered for publication in Climate of the Past. Although the reviewers raised many critical points, their reports are constructive. I hope they will help you to improve your manuscript for a submission to another journal.

Best regards

---
