Interactive comment on "Optimal Ranking Regime analysis of TreeFlow dendrohydrological reconstructions" *by* S. A. Mauget

Anonymous Referee #2

Received and published: 29 July 2015

I have read the paper "Optimal Ranking Regime Analysis of TreeFlow Dendrohydrological Reconstructions" by S.A. Mauget and like it a lot. I have no substantive criticisms of it at all. Within the limits of the unknown uncertainties inherent in the reconstructions themselves, all statistical bases appear to be well covered in my opinion. What I do request from the author is the stated opportunity to use his program. It would be nice to know in what language it is written and how it can be obtained. This information should be provided somewhere in the paper, say in the Acknowledgements.
