This is an outstanding summary of South American pollen records covering the last 2000 years. All data available have been critically reviewed, with those fulfilling the necessary high standards of dating control presented in an excellent graphical display. To see such a monumental task so expertly completed is fantastic. Is there a line missing on p. 3519 lines 19/20 about the easterly precipitation? Why is Harberton not plotted on Fig. 13? (I should note that obviously). Vera Markgraf
