Thank you for your comments. These comments are valuable and helpful for revising and improving our manuscript. On the part of the uncertainty of the climatic reconstruction and war data, we will elaborate in the revision manuscript. As for the coverage of temperature reconstruction, we intend to increase comparative analysis with the climate series of other regions (Northern Hemisphere, etc.) . Besides, wars are indeed affected by many complex factors. We will discuss the relevant factors, for example, the impact of “marring for the sake of peace” on the war. I hope you will be satisfied with the revised version, however, if there is more question, we are willing to revise it again. Once
