Received and published: 26 December 2015

Dear Authors, 4 reviewers had a careful reading of your manuscript and all provided detailed reviews. Some of these comments are converging so it could be easy for you to reply as this is the basic of EGU journal to provide, during the discussion phase a platform for exchanges between reviewers and authors but also between authors and the community. I strongly encourage you to reply each of them before I consider inviting you or not to submit any revised version. Indeed such decision I should provide will be based on these reviews and replies.

Looking forward to reading from you,

C2770

All the very best

denis-didier Rousseau

Climate of the Past co-editor in chief
