Received and published: 1 September 2006

The release of buried carbon is forwarded as a new idea despite a previous paper by the author. I think the author ought to consult the following paper that also appears to contain many of the ideas expressed in this paper from my very superficial examination of it. Franzen, L.G. (1994) Are wetlands the key to the ice-age enigma? *Ambio* 23:300-308.
