Sorry to mess up your page with lost of comments, but I forgot to mention one thing in my comment yesterday. I don't know how you will approach it yet of course, but if you went with the paper split I suggested, then you could continue the PMIP2-reference aspect into Part 2 by clearly indicating the as yet unresolved areas for future work, as well as pointing out progress made up to now (which you have already done nicely).

That's all!
