Interactive comment on “On the quality of climate proxies derived from newspaper reports – a case study” by D. Gallego et al.

H. Goosse (Editor)

hgs@astr.ucl.ac.be

Received and published: 3 October 2007

Dear authors,

Both reviewers have considered that your paper fits well in the scope of the journal and presents new and interesting results. Consequently, after the submission of your answer to the Referees' comments, I would be happy to consider a revised version for publication in Climate of the Past. This revised version should take into account the Referees' comments. In particular, the approach of the paper should be explained more precisely (see the comment of Referee 2) and the section about the potential influence of sea-ice on the snow fall in the Andes should be modified following the suggestions of Referee 1.
