

Interactive comment on “Comment on “Aerosol radiative forcing and climate sensitivity deduced from the Last Glacial Maximum to Holocene transition”, by P. Chylek and U. Lohmann, Geophys. Res. Lett., 2008” by J. C. Hargreaves and J. D. Annan

J. C. Hargreaves and J. D. Annan

Received and published: 25 February 2009

We thank the Referee #2 for their helpful comments. We were not previously aware of the useful review of Knutti and Hegerl (or the Ganopolski and Schneider von Deimling comment that Referee #1 also mentioned, which was published only after we had submitted our comment). In response to the specific points 1, 3 and 4, requesting further discussion of related issues, we do plan to expand the discussion of these aspects. However we wish to ensure that the main focus of our comment remains the
