

***Interactive comment on “Ecosystem effects of
CO₂ concentration: evidence from past climates”
by I. C. Prentice and S. P. Harrison***

J. Guiot (Editor)

guiot@cerege.fr

Received and published: 20 May 2009

Dear authors as you can see, both reviewers are very positive about your paper. I am then very happy to accept it after you will address the request "to briefly mention the actual concerns about the sensitivity and elasticity of the mentioned vegetation models to the modifications of driving parameters such as atmospheric CO₂ concentration" by second reviewer.

Best regards

J. Guiot
