

Interactive comment on “A reconstruction of Atlantic Central African biomes and forest succession stages derived from modern pollen data and plant functional types” by J. Lebamba et al.

J. Lebamba et al.

Received and published: 17 March 2009

The majority of comments raised by the reviews were included in the article. As regards, the symbols of Figures 1, 2 and 3 we had some problems: when I grow symbols of figures 2 and 3. Symbols overlap completely so we can not identify the various sites. it is impossible to change the format of the symbols.
