Dear Authors,

Your paper has been evaluated by three referees. They are all positive about your work and I would thus be happy to consider a revised version for publication in Climate of the Past. In this revised version, please take carefully into account all the remarks and suggestions made by the referees, in particular the one of Referee 1 about your interpretation of previous work on the subject. More information about the processes responsible for the simulated changes would also be very interesting (see Referee 1 comment) although this might be a difficult task as underlined by Referee 2.

C1027

Thanks again for submitting your work to Climate of the Past.

Hugues Goosse
