

Interactive comment on “Earth as diode: monsoon source of the orbital \sim 100 ka climate cycle” by R. Y. Anderson

D.-D. Rousseau (Editor)

denis.rousseau@lmd.ens.fr

Received and published: 1 January 2011

Dear Dr. Anderson,

The two reviewers released their reports and both of them are inquiring important improvements, points which should be discussed and argued. I would suggest you to provide the useful and necessary replies as the discussion phase allow you to do so. Therefore I would encourage you to submit a revised version of your manuscript taking into account these comments so that your manuscript could be definitively accepted for publication. You noticed that both reviewers required a major revision to have your paper published and as editor in charge of your paper, I will follow their request.

So looking forward for your revised manuscript, I wish you a very fruitful new year,

thanking you for choosing Climat of the Past to publish your study.

Yours sincerely

Denis-Didier Rousseau

co-editor in chief of CP
