Dear Authors,

after having receives the mainly positive comments of the three reviewers, you are now required to carefully reply to their comments and criticisms in order to finalize the discussion phase. I also ask you to prepare a revised manuscript for CP, in particular taking into account the numerous suggestions of reviewer #3. Instead of moving some of the technical matters to chapter 2 (as suggested by this reviewer), you may also consider to put the more technical into an appendix or supplement.

All the best, Volker Rath
