Received and published: 15 January 2011

May I draw your attention that the use of astronomical parameters requests the proper reference of Berger A., 1978(Long-term variations of daily insolation and Quaternary Climatic Changes. Journal of Atmospheric Science, 35(12), 2362-2367) as indicated clearly in the Supplementary material of Paillard, D et al (EOS,1996)(see <http://www.agu.org/pubs/eos-news/supplements/1995-2003/96097e.shtml>).
