Received and published: 13 May 2011

Dear Editor,

We have now submitted detailed responses to the comments of the reviewers we received. We noted in the response where the text was modified.

During the process of revising the manuscript, we received substantial help from G. Levavasseur in updating the figures and the text. As a consequence, he is now included as third co-author of the manuscript.

The updated manuscript (text & figures) is attached to this comment for reference.
