

Interactive comment on “Past dynamics of the Australian monsoon: precession, phase and links to the global monsoon” by L. Beaufort et al.

T. Kiefer (Editor)

kiefer@pages.unibe.ch

Received and published: 6 August 2010

Both Referee Comments received on the paper during the Discussion Phase are generally positive. Nevertheless, the referees raise a number of points - questions and suggestions on the data interpretation and some on the methodology.

I encourage the authors to follow the standard CP procedure, i.e. respond to all parts of the Referee Comments in an Author Comment and to revise the manuscript accordingly.

I look forward to receiving the response and revised manuscript no later than 27 August 2010.
