Received and published: 11 October 2010

Dear Dr. Born,

two reviewers have evaluated your manuscript. The first reviewer indicated that he/she would recommend to publish the manuscript if you account for his/her comments and requested more detailed description of the experimental setup. The later comment goes in line with the remark of the second reviewer who is unable to judge on the paper until more details on the model setup are presented.

I encourage you to thoroughly address the reviewer comments and submit a revised manuscript.

Yours sincerely,

C861

Victor Brovkin
