Dear Authors,

Your paper has now been evaluated by three referees. A major point that comes out of those reviews is the need to include a thorough discussion of salinity and density changes in your analysis. The referees also made some suggestions to improve the model-data comparison and the organization of the paper. If you think that you would be able to address those specific points and the other ones raised in the reviews, I will be pleased to consider a revised version for publication in *Climate of the Past*.

Thanks again for submitting your work to *Climate of the Past*.
