Your article is interesting and provides new high resolution data for the late Holocene in northern Africa.

However, regarding the discussion, i feel that there are some important references missing, which are on the same topic in the studied region and which could improve the discussion in some parts.

Gasse, F;Van Campo, E, 1994, Abrupt post-glacial climate events in West Asia and North Africa monsoon domains, Earth and Planetary Science Letters, 126, 435-456.

Gasse, F, 2000, Hydrological changes in the last African tropics since the Last Glacial Maximum, Quaternary Science reviews, 19, 189-211.

C1242

Gasse, F, et al., 1987, Biological remains, geochemistry and stable isotopes for the reconstruction of environmental and hydrological changes in the Holocene lakes from north Sahara, Palaeogeography, Palaeoclimatology, Palaeoecology, 60, 1-46

I hope you find them useful and might consider them for citation.
