Thank you for the helpful suggestions. I believe that we can make essentially all of the modification easily and it would be our pleasure to do so. As suggested in guest comment by Jim Ogg, there is essentially no "official" definition of Early Eocene currently so we are a bit leery of using the terminology, which is why we did not. We will think hard on the issue and try to come up with a reasonably self-consistent and transparent usage in the next draft. Thanks again for the review.
