Received and published: 23 September 2011

Dear Mark,

We have submitted a detailed response to the comments of both reviewers. With the revised version of the manuscript we will also provide a list of modifications which we will make in the manuscript to address reviewers criticism and suggestions. In particular, we will discuss the mechanisms of simulated glacial cycles in more details and will add additional figures suggested by reviewers. We will also devote more space to the comparison of our results with similar studies.

Best regards, Andrey, Reinhard
