Thanks to Jerry for his contribution, which is always welcome, I am sure that someone will find his comments useful. I think that I'm just going to interpret all these comments as not really being relevant to our paper. If Jerry would like to comment further on some of these ideas I can suggest joining the discussion over at <http://www.earth-syst-dynam-discuss.net/2/211/2011/esdd-2-211-2011-discussion.html> which might be a more suitable venue.
