Dear Dr Carre and co-authors,

Your paper "Exploring errors in paleoclimate proxy reconstructions using Monte Carlo simulations: paleotemperature from mollusk and coral geochemistry" has now closed for the open discussion phase and has received reviews by 2 referees. You will see that the referees have made very detailed comments about the text, experiment design and scope, and the accompanying MATLAB code. These comments seem to provide some very constructive ideas for improving the quality and application of the manuscript, and I suggest that with major revisions this manuscript may be suitable for publication in

C1588

Climate of the Past. I encourage you now to look over the referee comments carefully and to incorporate these into a revised submission of your paper. Accompanying this revised submission you will also need to provide a response to the reviewers, which should be submitted as a replies to the open discussion comments.

I look forward to receiving a revised a manuscript from you, and please don't hesitate to contact me if you require additional time to complete the necessary revisions.

Sincerely, Nerilie Abram
