Dear Dr. Okazaki,

your manuscript has received two Referee Comments. Both are generally positive, but raise a few points which I ask you to address. In particular, you should comment on your relatively narrow interpretation of the new record and reconsider how to best compare your data with previously published records.

I encourage you to follow the standard CP procedure, i.e. respond to all parts of the Referee Comments in an Author Comment and to revise the manuscript accordingly.

I look forward to receiving the response and revised manuscript.

Yours sincerely, Thorsten Kiefer
