Dear authors,

Both reviewers found the results of your paper worth to publish in Climate of the Past. They both consider the scientific quality to be good and consider the paper to be well-written. and both asked for revisions. Both reviewers recommend to publish the paper after minor revisions.

You have already replied to the points raised by the reviewers. Whereas I found your answers satisfactory in case of rev. 1, you seem only to have replied to the first point raised by rev. 2. Please reply also to the other points raised by the reviewer.

After doing so you are invited to upload a revised version of the ms..
