Received and published: 6 April 2011

Dear Dr Bassinot and co-authors,

Your manuscript submitted to Climate of the Past has now received comments from two referees during the open discussion phase. Both referees find this to be a very interesting paper that helps to resolve a long standing controversy about the different responses of monsoon-driven upwelling in the Arabian Sea during Holocene.

To proceed, I now ask you to look over the referee comments and suggestions for minor

C220

revisions to your manuscript. A response to the referee comments should be posted online in as Author Comment on the discussion paper, and your revised manuscript should be submitted to Climate of the Past.

Author Comments and a revised manuscript should be received by the 3rd May (final response stage of the online discussion). Please contact me if there are any problems with meeting this deadline.

Sincerely,

Nerilie Abram
