Received and published: 26 April 2011

Dear Dr Pausata,

Two reviews have been submitted concerning your manuscript. Although both referees find your results interesting, they also raise some major issues concerning your methodology and the analysis of the model results. You are now invited to reply to all points raised by the referees. In case you foresee that you are able to address all issues, you are invited to prepare a revised manuscript for submission to Climate of the Past.

Kind regards, Hans Renssen
