

Interactive comment on “Regional climate model experiments to investigate the Asian monsoon in the Late Miocene” by H. Tang et al.

M. Claussen (Editor)

martin.claussen@zmaw.de

Received and published: 28 April 2011

Two referees have reviewed the manuscript. They acknowledge the paper as an original contribution worth publishing in *Climate of the Past*. I agree with the referees and invite the authors to submit a revised version of their paper together with a careful reply to the referees in which the authors respond to each suggestion and question point by point.

Minor suggestion: In the first line of the abstract it might be useful to highlight why the Late Miocene is a *crucial* period for the Asian monsoon evolution. The experts might know, but the non-experts have to guess ...
