Dear authors,

I'm much more convinced now! I'd have appreciated to find such arguments to link your study to paleoclimate. Rollion-Bard last paper is of great help for that, too! I'd like to find this argument in a new version of your paper.

In your reply you refer to Figure 9 (9a & 9b). Can you post it on the website?

Likewise by reading your reply, you seem to already have come along the corrections on your paper. When would you be willing to upload the corrected version?

all the very best
