Dear Dr. Dickens,

As you have seen in the open discussion, your manuscript did not only receive detailed attention by the specialist I invited as reviewers but also by several others. All reviews are constructive and sometimes pose questions. They are also generally very positive. Given your responses so far, I am confident that you will improve the MS using the comments made by the reviewers.

C732

I am looking forward to receiving a revised manuscript.

Sincerely,

Appy Sluijs Editor
