Received and published: 17 June 2011

The CPD version of this paper contains some changes relative to the manuscript version I had accepted for CPD. The changes had neither been authorised by me as the handling editor, nor had they been made with the agreement of all co-authors.

The changes concern the author list and status, first-author affiliation, and acknowledgments. The original information, which should have gone unaltered into the CPD paper, is given in the attached supplement pdf. The author status has been reinstated as below, with the responsibility for correspondence with Q.-B. Zhang.

Before proceeding to the revision stage, I request that all co-authors agree on any
C866

potentially controversial formalities of the paper and state this actively in an author comment. This is vital for the paper to proceed.

With kind regards,

Thorsten Kiefer, handling CP editor for this paper
