Dear authors

You have now received the comments of two reviewers about your paper. You have seen that both are positive and advise to accept your paper after minor revisions. Maybe the most important criticism concerns the lack of independent validation, as mentioned by both reviewers. I propose you now to consider all the comments and to take them into account in your revised ms. I expect also to receive a cover letter explaining your changes or giving arguments when you disagree with some comments.

Waiting your revised ms... Best regards

J. Guiot
