Dear Dr. Guiot, dear reviewers, We have now read through the reports and editors decision and would like to thank for the positive and helpful commenting on the ms. The review reports indicated several points in the ms that will need to be addressed during the revision. Since these request further details on methods or further explanations, we do not see any difficulty to improve the respective parts of the text. We will carefully re-work the text and submit a revised version (accompanied with a point-to-point explanation) by mid September 2012. On behalf of all authors, Beat Naef-Daenzer
