

Interactive comment on “Temperature response to external forcing in simulations and reconstructions of the last millennium” by L. Fernández-Donado et al.

J. C. Hargreaves (Editor)

jules@jamstec.go.jp

Received and published: 26 October 2012

The reviewers are both very positive about the paper, so please attend to the minor revisions and submit a revised manuscript.

As well as the revised manuscript, it would be most helpful if you could upload a diff file showing the changes between the original and revised manuscripts.
