Dear Dr. Scardia,

Thank you for your useful comments and giving us the opportunity to clarify these points. Concerning the dating methods for the attribution of Fontana Ranuccio to the OIS 12, you did point an incoherence in the preparation of our manuscript, and I am grateful about this. This imprecision has been noted and will be revised.

I also thank you for your remark concerning the Ceprano calvarium attribution and the recent reference you notified me. This point will be corrected following the more parsimonious discussions addressed in Mounier et al. article.

C2082

These issues will be revised in the final draft for publication, following the open discussions. Thank you very much for the important improvements you drove to my attention.

Kind regards, Ronan Orain
