Received and published: 13 November 2012

Dear Susanne Buchardt and co-authors,

The Climate of the Past Discussion phase of your manuscript “Investigating the past and recent $\delta^{18}\text{O}$ -accumulation relationship seen in Greenland ice cores” has now ended and your manuscript has received comments from two reviewers. The reviewer comments are positive with only a few suggestions for improvements, and indicate that your paper should be suitable for publication in Climate of the Past with minor revisions.

To continue with the review process, you now need to revise your manuscript based on the reviewer’s comments. You also need to prepare a response to the reviewer comments that addresses each point raised and outlines your response and any changes

made to the manuscript as a result. These responses should be posted as an author comment on your paper's discussion page.

Please let me know if you have any questions, and thank you for submitting your work to *Climate of the Past*.

Sincerely, Nerilie Abram
