Received and published: 18 January 2013

Dear Stephanie Desprat,

Manuscript cp-2012-177 entitled ‘ Deglacial and Holocene vegetation and climatic changes at the southernmost tip of the Central Mediterranean from a direct land-sea correlation’ has been reviewed by two external reviewers.

Both Referees have observed that the manuscript is a quite interesting contribution and have recommended publication after revision.

C3144

Therefore, I invite you to respond to the referees comments and revise your manuscript accordingly. You should pay special attention to the recommendation by Referee 1 about chronological uncertainty, and to that by Referee 2 about the need to shorten the manuscript.

Once again, thank you for submitting your manuscript to Climate of the Past. We look forward to receiving your revision.

Your sincerely,

Michel Magny
