

***Interactive comment on “The initiation of modern soft and hard Snowball Earth climates in CCSM4” by J. Yang and W. R. Peltier***

**A. M. Haywood (Editor)**

eamah@leeds.ac.uk

Received and published: 30 April 2012

Both reviewers have provided thoughtful comments on the first version of the paper. The authors in return have replied in a satisfactory manner.

Based on the reviewer’s suggestions I urge the authors to now proceed and prepare a revised manuscript (which appears to be already in progress).

Alan Haywood.
