Received and published: 25 February 2013

Dear Hendrik, The two reviewers of your manuscript have released their report that I strongly encourage to follow when considering submitting a revised version. As the discussion phase is still open, I also encourage you to comments those suggestions during this discussion phase so that your could exchange with them and arguing whether or not you feel them valuable or not. Indeed it is referred a lot to the Science paper and this requires some reply from yourself. Once more the discussion phase is the opportunity to reply the reviews. All the very best cheers denis-didier Rousseau CP Co-Editor in chief
